

Epoxy Coating

Industrial and Commercial Users

DESCRIPTION

Behl Epoxy delivers high solids epoxy-coating technology that can be used in a variety of different applications. This epoxy paint is especially useful on concrete floors for an abrasion resistant & chemical resistant finish. Behl Epoxy has been used to protect and visually enhance floors in assembly plants, airplane hangers, industrial facilities, food processing plants, steel mills and processing facilities, storage facilities, retail establishments, and almost every other type of facility you can think of. Heavy Duty 2 part Epoxy Coating that will Outperform any Conventional Paint! Recommended for Interior Use.
